

## Drip Irrigation Set Up

**Drill holes into tubing so that the ring puts out at about 5 gallons per hour. Trees greater than 2" caliper need 10 -20 gallons of water, twice a week.**

**Punch holes in the tubing**

**...Or, add an emitter (two emitters for each tree)**

## Soaker Hose Set Up

When using soaker hoses, be sure that it runs long enough and that there is enough pressure for all plants. You may have to punch holes into the hose for some types of soaker hoses

## Watering Bags

**Watering bags need to be filled at least twice per week.** Be sure that the soil is wet before placing the filled watering bag(s) in place. Watering bags are available at **Hopkinton Stone & Garden.**
